Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: It is quire clear from context that “the physical channel” and “the physical channels” (one in singular and the other in plural) both refer back to “one or more physical channels.” For consistency, however, one of “the physical channel” and “the physical channels” should be used. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Honkasalo et al (US 6,064,663).

Referring to Fig. 1A and 4A, Honkasalo et al discloses a communication apparatus (100), comprising;

a) a means (124) for determining the “number of radio frames of a fixed duration,” on each of one or more physical channels in accordance with a transmission rate of the physical channel. See col.11, line 29 – col.12, line 44, describing that the number of subchannels (SC’s) of a fixed duration, i.e., “radio frames,” is determined on the basis of

a transmission rate. The subchannels, i.e., "radio frames," make up "a unit by which processing of a logical channel is carried out" since they comprise a frame, i.e., "a unit," and the frame is processed as a logical channel.

b) a means (122) for mapping the logical channel into the physical channels, in that the subchannels representing a logical channel are multiplexed, i.e., "mapped," on a physical channel, i.e., an RF signal, and

c) a means (138) for transmitting a signal over the physical channels. See col. 4, lines 32-35.
